C++

ABOUT ME

Python/Web developer with a passion to create software and web applications. Looking to apply skills that I have learned throughout my college career in a real-world environment.

PROJECTS

manga-updater

- Created a Python script to notify me via e-mail when a new chapter of a certain book or manga is released
- Scrapes information of the new chapter and populates the wanted details into a Google Spreadsheet
- Incorporated technologies: Google Drive API, Google Spreadsheets API, Selenium, BeautifulSoup

Company Database application

Incorporated HTML/CSS/PHP/SQL, styled with Bootstrap
Basic security filtering user input and double-checking expected values
Implemented authentication methods with PHP
Provided session control for registered users
Developed mock database schema with tables that supported 3rd normal forms

Digital Tailor

- Collaboratively made WebApp for Front-End Web Engineering course
- Incorporated technologies: HTML, CSS, JavaScript, eCommerce APIs, Bootstrap, Git

EXPERIENCE

Teaching Assistant

Jan 2019 – Present

California State University, Fullerton – Fullerton, CA

- Provided clarity to students about basic programming concepts
- Aided professor with grading
- Provided supplemental instruction outside of course hours

Server

Nov 2017 – Jan 2019

Boiling Point Group USA – Garden Grove, CA

- Clear verbal communication amongst peers and customers
- Delivered friendly and professional service to customers to ensure a pleasant dining experience
- Juggled requests from multiple customers in a short manner

SKILLS

- Highly adaptable, embrace teamwork, but also enjoy working independently
- Excellent verbal and communication skills
- Familiar with Python web-based frameworks: Django & Flask
- Knowledge in MongoDB
- Microsoft Excel, Word, PowerPoint
- Git
